FORMATS FOR ADVERTISING ARTWORK

FILE FORMAT

- High res PDF 1.3 compliant with PDF/x-1a:2001 only (Quark, InDesign, EPS and TIFF files are NOT accepted).
- PDF files shall not be created with Adobe PDFWriter product.
- Files must not contain any transparent elements.
- Files must be composite.
- Files must be CMYK.
- Files must not contain crop marks or bleed, they should be set to Ad size only.
- All images, color and grayscale, contained in the PDF must be high resolution ((150dpi min, 300dpi max, recommended).
- Multiple master fonts must not be used.
- Embedded composite fonts, which are not sub-set, should not be used in a PDF file.
- All fonts must be embedded and all embedded fonts must be subsetted.
- A PDF file should not contain white text set to overprint.
- PDF files should not contain annotations that are set to print.
- Images using 16 bits per sample should not be used in PDF files.
- The number of pages in a PDF file should be exactly one.
- Total Area Coverage (TAC) of elements on a page should not exceed 260%.
- Resolution of 1-bit images and grayscale images should not be below 2400 dpi. 1-bit images should not use JBIG/ vector compression.
- The NET-A-PORTER Group's printer will honour overprint settings that are included in the file and black will overprint or knockout depending on the instruction.

FILE DELIVERY

- Specle – net-a-porter-group.specle.net is a web-based advertising delivery solution that will preflight and check your file to our specification and deliver it safely to us.
- Files should be labelled in the following format: Publication_Issue_Client Name.
e.g MRPORTERPOST_24_CLIENTNAME

- Net-a-Porter Group will make all reasonable efforts to ensure that the content is printed within the ISO 12647-2 printing condition.

FILE CREATION

- All files must be submitted as PDF/x-1a:2001 as per the pass4press guidelines outlined in version 10. The output intent should be set to PSO_Uncoated_ISO12647_eci.icc (47L). PDF-creation specifications can be downloaded from www.pass4press.co.uk. Profiles are available from www.eci.org
- If you choose to create your own profile, it must fall within the characterisation set outlined above.

PROOFING

- Digital proofs must be 100% of the final size and must be produced from the exact PDF file supplied.
- Digital proofs can be accepted from a range of devices.
- Please check the FOGRA website (www.fogra.org) for a list of FOGRA-accredited devices, based on the ISO 12647-7 proofing standard.
- YOOX NET-A-PORTER Group request that all proofs are supplied on Epson GMG 140gsm matt and output to PSO_Uncoated_ISO12647_eci.icc (47L)
- All proofs must include the UGRA/FOGRA media wedge CMYK v3.0a. This should be included outside the page area, reflecting the relevant output intent. The UGRA/FOGRA Media Wedge CMYK is intended for the monitoring of digital proofs and is used as a digital control aid to monitor the effect of imaging in CMYK mode (see www.mediawedge.com). Proofs should be validated using the wedge and a proof control system; please ensure that the approved sticker or full report is attached to the proof.
- Yoox Net-a-Porter Group requires that all proofs supplied for colour matching have an average Delta E tolerance of 2 (for optimum proof control and standardisation). No single patch should have a Delta E variation greater than 3.
